

Pole-Mount Bracket for Solar Panels (Series 2PV)

Installation Quick Guide

This quick guide provides step-by-step instructions for installing the pole-mount bracket for **Solar Panel Series 2PV** on poles with a diameter of **40-100 mm (1.6-4.0 in)**. The bracket tilt can be set to **15°, 35°, 45°, or 65°**. Follow each step carefully to ensure a secure and stable installation

Safety Information

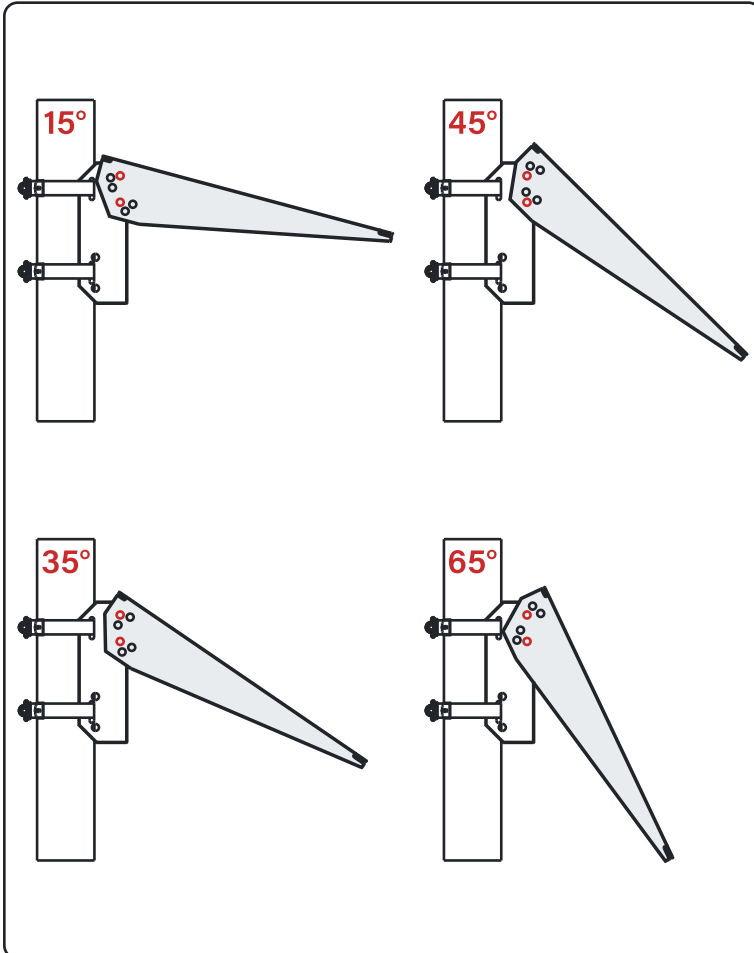

⚠ WARNING

- Wear appropriate protective equipment (helmet, gloves, and eye protection).
- Ensure the pole is securely anchored and stable before installation.
- Do not install during high winds or severe weather.

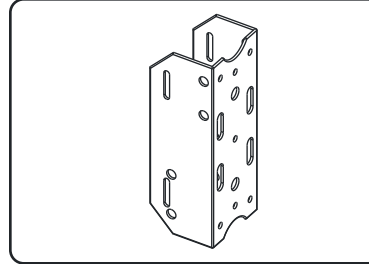

NOTICE

- Ensure the solar panel and bracket are properly secured during lifting.
- Verify that all fasteners are properly tightened after installation.

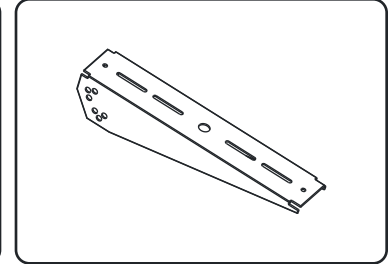

Supported Installation Angles

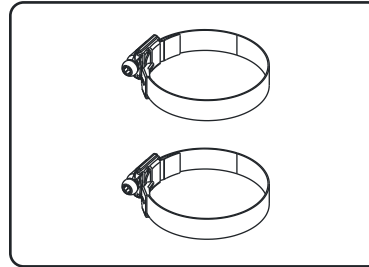

In the Box

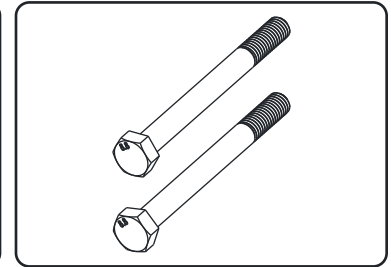

1 x pole bracket

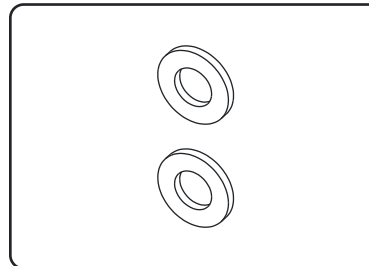

1 x solar panel bracket

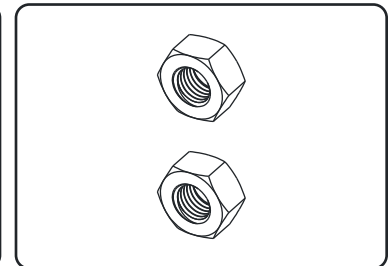

2 x worm-drive clamp

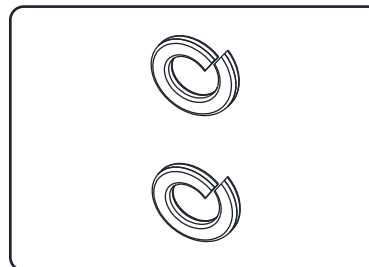

2 x M12 bolt

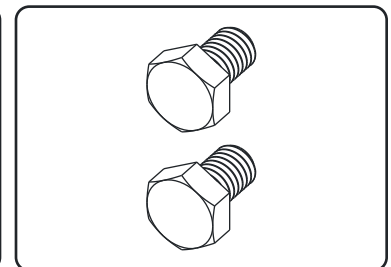

2 x flat washer

2 x hex nut

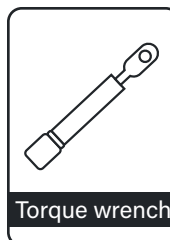

2 x split-lock washer

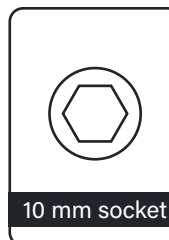

2 x M6 screw

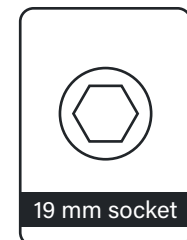

Required Tools

Torque wrench

10 mm socket

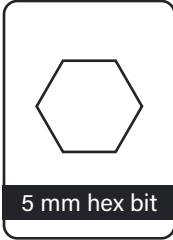

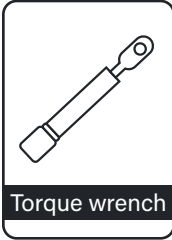

19 mm socket

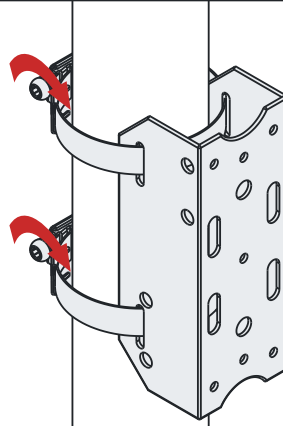

5 mm hex bit

Installation Steps

- 1** Attach the pole bracket to the pole using two worm-drive clamps. Tighten the clamp screws to 2 Nm.

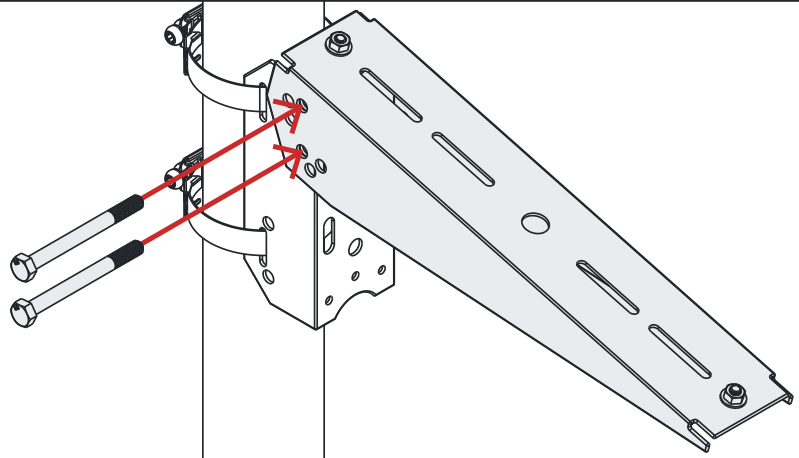

2 Nm

NOTICE:

Only poles with a diameter of 40–100 mm (1.6–4.0 in) are supported.

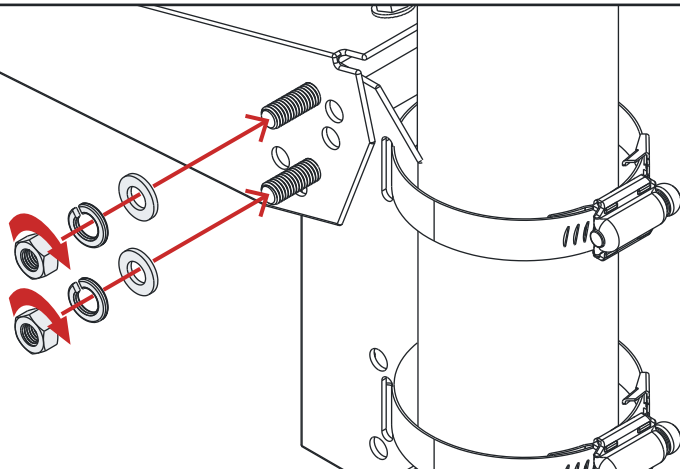

- 2** Attach the solar panel bracket to the pole bracket by inserting two M12 bolts through the mounting holes at the desired angle (15°, 35°, 45°, or 65°).

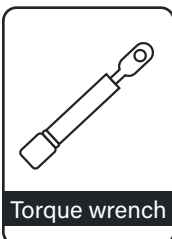

- 3** Secure both M12 bolts using a flat washer, split-lock washer, and hex nut. Tighten each nut to 80 Nm.

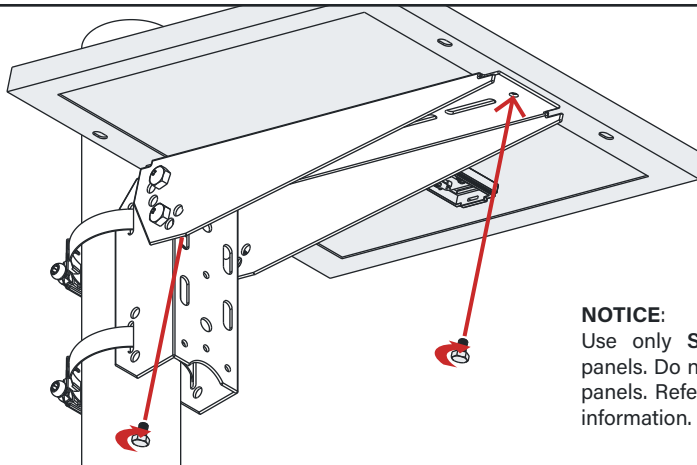

80 Nm

- 4** Install the solar panel onto the bracket using two M6 screws. Tighten the screws to 10 Nm.

10 Nm

NOTICE:

Use only Solar Panel Series 2PV panels. Do not install third-party solar panels. Refer to our website for more information.
